Thursday, November 4 • 9:30 am to 4:30 pm
Registration opens Thursday, October 14

This educational class is for mature-minded students in Grades 6 to 12 who have an interest in Law Enforcement and/or Science and/or Forensics. Students will learn general problem-solving skills and how STEM principles can be used to help solve a crime scene. After each block of instruction in this 7-hour course, there will be hands-on drills that reinforce the lecture. Students will learn the importance of gravity and inertia, biology, DNA, fingerprinting, blood splatter, footprint casting, and get an opportunity to process a mock crime scene and determine what happened based on what they have learned in class.

The class will be conducted by Sean Clancy, a retired Captain of Detectives, who worked in various units of the Atlantic County Prosecutors Office, such as SWAT, Homicide, Intelligence, and Narcotics/Violent Crimes. He is currently an instructor for the NJ Chiefs of Police's *Command and Leadership Class*

Limit: 20 students in Grades 6 to 12

Registration required. Visit the Teen Events Calendar on our website or scan the QR code for details.
